**P**hilippe Baptiste began his career at the French National Center for Scientific Research (CNRS) in 1999. He joined IBM's research team in New York in 2000, then was lecturer at Ecole Polytechnique and director of the LIX computer science laboratory in 2008. He was appointed director of the CNRS Institute for Information Sciences and Technology in 2010.

In 2013, he became head of research and innovation strategy at the French Ministry of Research and Higher Education, and in June 2014 Chief Research Officer at the CNRS.

Mr. Baptiste has published a number of books and several hundred papers and articles, of which 40 have appeared in international journals. He has led many R&D projects with software developers and industry-leading manufacturers.

Philippe Baptiste has been appointed Senior Vice President, Scientific Development at Total, effective February 1, 2016.
